

REMARKS

In the office action mailed March 31, 2005, Claims 1-41 were pending for consideration. Of these, the Examiner made a restriction requirement alleging that Claims 1-13 and 27-41 (Invention I) and Claims 14-26 (Invention II) were patentably distinct inventions. By the present election, Applicant elects the claims of Invention I *without* traverse for further prosecution in the present patent application.

Further, Applicant has added new Claim 42. Support for this new claim can be found in the originally filed specification at page 15, lines 10-26. No new matter is introduced by this amendment. Claim 42, depending from Claim 1, is part of elected Invention I. Accordingly, upon finalization of the restriction requirement by the Examiner, Claims 1-13 and 27-42 will remain pending for consideration in the present patent application.

CONCLUSION

Based on the foregoing amendment and election, Applicant believes that the present claims are ready for Examination. However, if any impediment to entry of the present amendment and further consideration of the present patent application is found, and such impediment could be addressed during a telephone interview, the Examiner is invited to telephone either Mr. David W. Osborne, or in his absence, the undersigned attorney at (801) 566-6633, so that such issues may be resolved as expeditiously as possible.

Please charge any additional fees except for Issue Fee or credit any overpayment to Deposit Account No. 20-0100.

Dated this 28th day of April, 2005.
